

Bringing your message to new heights (and back down again)

Signage is helpful until it gets in the way of a great show! This is a problem we needed to solve. Designed specifically for live events at stadiums and venues, this telescoping sign post allows signage to stand tall for preshow wayfinding and drops down when the show begins. Velcro mounted signage panels easily change for use in any area you require it. The fillable base provides stability, yet is easy to move with integrated wheels.

Changeable signage allows the same hardware to be used while being able to utilize the sign for different needs.

High grade post materials: steel inner post with a HDPE outer shell.

Telescoping post: extends to 8' tall and retracts to 5.25' with push pin.

Specs

- Height: 8' extended; 5.25' when collapsed
- Width: 22"
- Weight: 30 lbs. empty base; 200 lbs. full base*
- Sign: 11" W x 17" H
- Base: 22" W x 21" H x 22" D

Features
