

## Featured Product: Model SSG3012

### Control traffic flow at entranceways and exits

The Security Swing Gate is a durable yet lightweight panel that permanently mounts to any standard Retractable-Belt® post. It blocks off an opening to restrict access, while a digitally printed panel displays messages or branding to customers standing in line.

**Self-Centering Double Action Hinges:**  
allow the gate to swing in both directions

#### Additional Features

- ▶ 30"W x 12"H panel dimensions
- ▶ Custom printed gates allow custom branding, messages, full color logos, etc.
- ▶ Gate replacements are available for existing Swing Gate Systems

Includes Heavy Baseweight on accompanying posts (sold separately) to keep the posts stable and prevent shifting when the gate is activated

Model #  
SSG3012L-DP

**Strong, 1/4" thick Durabond:** available in black, white, or with custom printing
